COMPOUNDS

A compound is a pure homogeneous substance made up of two or more elements combined together in a fixed proportion by weight. Compounds can be decomposed into simpler substances by chemical methods only.

COMPLETE THE GIVEN TABLE

COMPOUND	ELEMENTS PRESENT	FORMULA
	Hydrogen, oxygen	
Common Salt		NaCl
	Carbon, hydrogen, oxygen	
Marble, chalk		CaCO ₃
Carbon dioxide		
	Silicon, oxygen	SiO ₃
Ammonia		NH ₃
